

Paz Menachem

SECURITY ENGINEER

Israel | +972-53-270-3667 | paz.menach@gmail.com | linkedin.com/in/paz-menachem | github.com/pazMenachem

PROFILE

IT & Security Engineer at an 80-person SaaS company, reporting to the CISO. Built and shipped two internal platforms now in daily production use, one of them company-wide. Day to day: cloud and identity hardening on GCP and Oracle Cloud, firewall and network policy, SIEM and EDR investigation, access control and SOC 2 Type II. B.Sc. in Computer Science. Targeting a cloud security or DevSecOps role.

EXPERIENCE

IT & Security Engineer — Copyleaks

01/2026 – Present

Sole IT and security engineer for an 80-person SaaS company, reporting to the CISO. Led the technical evidence work for the SOC 2 Type II audit, and own the endpoint fleet, identity and the employee lifecycle.

- Built and shipped the HR performance-review platform, now used by all 80 employees: OIDC authentication, role-based access control, private file storage. TypeScript, Firestore, Cloud Run.
- Built Manage-IT, used daily by the IT and security team: onboarding and offboarding checklists, device inventory synced from two MDM platforms, employee directory synced from the IdP.
- Maintain firewall rules, network policies and permission oversight across GCP and Oracle Cloud, including removal of unused identities and recurring access reviews.
- Handle 60+ access requests a month across cloud, databases, VPN and code repositories, each time-limited and logged.
- Investigate alerts in Elastic SIEM and CrowdStrike EDR across 10+ connected systems, including validating the output of a behaviour-based ML detection layer.

Teaching Assistant & Mentor — Excellence team / Start-Up Nation Central

03/2025 – 08/2025

Invited back after completing the bootcamp: graded student exercises for a full semester, then mentored teams on projects sponsored by NVIDIA, Google and Check Point.

Programming Teacher — Magshimim, Israel Cyber Campus

2022 – 2024

Taught C++ and computer networks to 10th and 11th graders; mentored 40+ students toward elite IDF cyber units, two thirds of them accepted.

PROJECTS

- **JobHunter** — Automated job-search pipeline in Python: crawls listings, filters them with an LLM, pushes matches to Telegram or email. Provider-based architecture with factories for the LLM and notification layers, Dockerised, scheduled runs.
- **My_Internet** — Linux kernel module in C filtering domains and ad traffic at the packet level, with a Python management interface.
- **Self-hosted AI agent** — Personal assistant built on the Claude Agent SDK and deployed on a Raspberry Pi: API integration, tool design, service deployment, securing a self-hosted device.

EDUCATION

B.Sc. Computer Science, Tel-Hai Academic College — 2024. Average 85. Red Hat Beyond course: built a Django application in a team of five under Red Hat mentorship.

Excellence team Software Development Bootcamp, Start-Up Nation Central — 08/2024. Worked with mentors from the Israeli tech industry on software architecture and problem solving.

TECHNICAL SKILLS

Security operations: Elastic SIEM (ES|QL, detection rules, alert triage), CrowdStrike Falcon EDR, DLP, incident investigation, SOC 2 Type II, access reviews

Cloud & identity: GCP IAM, Oracle Cloud IAM, Microsoft Entra ID, Keycloak, SAML, OIDC, SSO, MFA, Google Workspace Admin, least-privilege access design

Development: Python, TypeScript (Next.js, Fastify), C, C++, Bash, PowerShell, REST APIs, Firestore, PostgreSQL, Git, Claude Agent SDK, MCP, n8n

Infrastructure & endpoint: Docker, Terraform, Cloud Run, CI/CD, Linux, Microsoft Intune, Apple MDM, Cloudflare, OpenVPN, firewall policy; Kubernetes (theoretical)

MILITARY SERVICE & VOLUNTEERING

Combat Soldier, Armored Corps, 7th Brigade — 2013–2016

Rabin Pre-Army Preparatory Program — 2012–2013

AKIM, support for people with intellectual disabilities — 2009–2012
